

CMPS 312 – Mobile Application Development

Syllabus and Course Admin

Dr. Abdelkarim Erradi

Department of Computer Science & Engineering

Qatar University

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Outline

- Course introduction
- Grading
- Policies

About the Instructor

- **Dr. Abdelkarim Erradi**
 - **Office:** Office 132 Female Engineering Building
 - **Phone:** 4403 4254

Office hours:

- **Sunday 12:10pm to 1:10pm for Female** on MS Teams
- **Sunday 12:10pm to 1:10pm for Male** on MS Teams
- You can talk to me **after** class if you have quick issues/questions
- Best way to contact me is via **MS Teams chat**

Course Learning Outcomes

1. Design a mobile application based on established **design patterns** and **best practices**.
2. Design and implement an interactive and effective **user interface** for a mobile application.
3. Practice integrating **on-device sensors, local data stores** and **Cloud services**
4. **Design, implement and test** a mobile application using appropriate features, tools and application programming interfaces (APIs) of the mobile development platform.

Schedule

Topics	Weeks	Chapters
Kotlin programming language	2	Online readings
Views and Layouts	2	1, 6, 9 & 10
Navigation	1	12 & 14
Data binding	1	
Asynchronous programming	1	Online readings
Data management	1.5	11
Integrating with Cloud services and Web API	1.5	24
Cloud Firestore & Firebase Authentication	1	Online readings
Background processing	1	27
Camera, Location services APIs and Google Maps	1	Online readings
Review & Exams	1	

Recommended Textbook

Bill Phillips, Chris
Stewart and
Kristin
Marsicano;
**Android
Programming:
The Big Nerd
Ranch Guide**, 4th
Edition, 2019

**Plenty of online
resources will
be providing**

How to get the textbook online

- Visit <https://www.oreilly.com/library/view/temporary-access>
- Select 'Not listed, click here'

- Enter your QU email address to gain access
- Search for the textbook '**Android Programming: The Big Nerd Ranch Guide**'
- You will also get an email to set a password for your account

Your Grade is Based on:

Lab assignments	30%	Individual Lab assignments (5 out of 6)
Project	30%	2 Phases (group of 3 students)
Midterm exam	20%	Theory (10%) & Lab Practical (10%)*
Final exam	20%	Theory (10%) - Consult University exam timetable Lab Practical (10%)* - during the last Lab

* Students **who get less than 50 marks** out of 100 in the Practical Midterm/Final we get their project's grade reduced to half of the group grade

How to succeed in this course....

- ❑ Do your weekly assigned readings
- ❑ **Read the slides before you come to the class**
- ❑ **Exercise a lot – study as many examples as possible**
 -  – Understand and enhance the examples I provide as well as the ones in the textbook and the ones in the provided resources
- ❑ **Attend and participate in class**
 - ❑ Many of the exam questions are from the class explanation
- ❑ Do all the assignments and project **yourself**. Actively contribute to your project.
- ❑ Seek help when needed and ask questions (and do it **EARLY**): During Lectures/Labs & Come to office hours

Learn to Swim!

We learn swimming by swimming and we learn design and programming by practicing it!

Software we will use

- Android Studio
<https://developer.android.com/studio>
- GitHub Desktop
- For modeling we will use **Visual Paradigm**
<https://ap.visual-paradigm.com/qatar-university/license.jsp>
- Other tools will be communicated to you as we go

**GitHub will be used to deliver content,
assignments and projects**

***Check <https://github.com/cmeps312f20/cmeps312-content>
regularly!***

**Lecture slides, Demos and Assignments
are there!**

Communications will be via **MS Teams**

Important Notes

- **Attendance...** QU attendance policies will be enforced
 - Do not miss classes/labs
- **Start your assignments and project early!!!**
- Students are expected to learn independently as much as needed in order to complete the course requirements
 - Do not expect me to find/fix your code bugs
 - Do not expect me to find and fix your technical issues
 - I can only give you high level suggestions and guidance

No 'Free Riding' allowed

- 'free riders' (who do not contribute much) => not acceptable and not fair for hardworking students
 - You must actively contribute to your project and do your ultimate best to deliver the best possible results
 - Otherwise you will be asked to do the project alone

Plagiarism / Cheating

- “Getting an unfair academic advantage”
 - Using other people's work as your own
 - Not doing your assignments yourself
- All the code you submit has to be your own
 - Only exception: Code I have provided or explicitly authorized
 - **NO** code you have found on the web. **NO** sharing with others.
- **Do your homework and project yourself**
 - Do NOT copy from each other or from the Internet - **I will know it!**
 - You can be picked-up randomly to explain your implementation
 - Cheating will be treated very seriously
- Penalties START with a zero on the assignment, failing the course! and other disciplinary actions as per QU policy

Communication

- Post your technical questions to Piazza
- When emailing me you must add – **CMPS 312** to the beginning of the email title
e.g., CMPS 312 – Request for a meeting
- For **guidance** on technical issues come to office hours NOT by email

To do by the end the 1st week

- Create GitHub account and join the course GitHub classroom (see instructions on MS Teams)
- Form a team and setup your team's GitHub repo (see instructions on MS Teams)
- Install the required software: Android Studio & GitHub desktop
- Sign to Piazza, we'll be conducting all class-related discussion @ <http://piazza.com/qu.edu.qa/fall2020/cmeps312>

I wish you a fruitful and enjoyable journey!
